# DLookupSamples

Note that the same logic applies to most Domain Aggregate Functions (**DMin, DMax** etc.)

tags:
HowTo

## Normal usage

- For numerical values:

```
DLookup("FieldName" , "TableName" , "Criteria=" & num)
```

- For strings: (note the single quote before and after the value)

```
DLookup("FieldName" , "TableName" , "Criteria='" & string & "'")
```

- For dates: ISO notation => **YYYY-MM-DD**

```
DLookup("FieldName" , "TableName" , "Criteria='" & Format(date, "YYYY-MM-DD")
```

## Refering to a form control

- For numerical values

```
DLookup("FieldName", "TableName", "Criteria=" & getValue("Forms!FormName!Cont
```

- For strings: (note the single quote before and after the value)

```
DLookup("FieldName", "TableName", "Criteria='" & getValue("Forms!FormName!Cont
```

- For dates:

```
DLookup("FieldName", "TableName", "Criteria='" & Format(getValue("Forms!FormNa
```

## Mix-n-Match

```
DLookup("FieldName", "TableName", "Criteria1=" & Forms!FormName!Control1  _
        & " AND Criteria2='" & getValue(Forms!FormName!Control2) & "'" _
        & " AND Criteria3='" & Format(getValue(Forms!FormName!Control3), "YYYY
```
