## Description

Returns the description of a field pertaining to a **table**, a **query** or a **recordset**

tags:  
Properties

### Applies to ...

Object	Description
Field	The representation of a field of a table, a query or a recordset.

### Syntax

```
field.Description  
field.Description = Value
```

### Returned values / Arguments

String

### Remarks

The *Description* property is visible in the *Description* column of the *Table Design* view of Base.  
It is read-only except if the field pertains to a **table**.

### Error messages

Value '...' is invalid for property 'Description'
