Index

The *Index* property specifies the index number for a **CommandBarControl** object in the **CommandBarControls** collection of **CommandBar**. The property is read-only.

tags:
Properties

Applies to ...

Object	Description
CommandBarControl	An element of a CommandBar.

Syntax

`commandbarcontrol.Index`

Returned values / Arguments

`Integer`

Remarks

For compatibility reasons with Microsoft Access the **Index** property starts at 1, not at 0.

To retrieve a commandbarcontrol object from its collection and you know the value of its *Index* property, use that value minus 1 as argument of the CommandBarControls collection.
