

## Picture

The *Picture* property specifies a bitmap or other type of graphic to be displayed on the specified control.

tags:

Properties

### Applies to ...

Object	Type when in a form	Type when in a GridControl	Type when in a Dialog	Description
Control	CommandButton ImageButton ImageControl	None	CommandButton ImageControl	A control on an open form or a dialog of one of the listed types.

### Syntax

*control*.Picture

*control*.Picture = *value*

### Returned value / Argument

String

### Remarks

- The control MUST NOT be bound to a database field.
- The *value* argument may be provided either in the (recommended) URL format (i.e. "[file:// ...](#)") or by using the operating system usual syntax (e.g. "C:\..." in Windows). However the argument is always returned in the URL format.

### Error messages

Property 'Picture' not applicable in this context
Value '...' is invalid for property 'Caption'

### Example

Modify the picture displayed in an ImageControl control.

```
Dim ofForm As Object, ocControl As Object
    Set ofForm = Forms("myForm")                                ' Form must be open
    Set ocControl = ofForm.Controls("MyImage")
    ocControl.Picture = "C:\MyPicture.jpg"
```
