SourceField

Returns a value that indicates the name of the field that is the original source of the data for a **Field object**.

tags:
Properties

Applies to ...

Object	Description
Field	The representation of a field of a TableDef or a QueryDef .

Syntax

`field.SourceField`

Returned values

String

Remarks

- The value returned by the *SourceField* property of a field belonging to a *TableDef* is probably not relevant. It is however applicable.
- The *SourceField* property is not valid for a **Recordset** object.
